EDUCATION

Jawaharlal Nehru Technological University Anantapur

Aug 2023 – May 2027

B.Tech Computer Science And Engineering

CGPA: 8.64/10

SR Junior College

July 2021 – June 2023

Board of Intermediate Education

Percentage: 98.3

EXPERIENCE

Full Stack Developer Intern

May 2026-June 2026

QClairvoyance

Vijayawada, Medha Towers

- Developed the QClairEdu Learning Management System (LMS) using React.js, JavaScript, and Python, implementing interactive learning features such as flashcards, streak tracking, and educational content management to enhance student engagement and learning experience.
- Engineered a Retrieval-Augmented Generation (RAG) system using Python and Large Language Models (LLMs) to deliver context-aware AI responses from educational content, while improving content organization and integrating visual learning assets across multiple modules.

Software Developer Intern

March 2026-April 2026

Gannet Solutions

Online

- Developed an internal web-based automation platform using Python, Flask, Pandas, and Scikit-learn to generate polynomial regression coefficients, equations, and summary reports from CALG-generated datasets, with support for dynamic multi-output processing and automated Excel report generation.
- Streamlined engineering workflows by reducing manual data processing effort and minimizing dependency on third-party statistical tools such as Minitab, while designing a modular architecture for future integration directly into the CALG platform.

PROJECTS

AI Anantapur Police Hackathon – Cyber Fraud Money Trail Intelligence System -(Link)

- Developed a financial fraud detection and money trail intelligence platform that processed 1,000+ financial transactions to identify linked accounts, visualize fraud networks using graph analytics, and implement risk scoring, freeze recommendations, and recovery tracking features to support faster cyber fraud investigations and decision-making.
- **Tech Stack:** Node.js, React.js, PostgreSQL, Python, D3.js, Graph Analytics, Data Visualization.

JNTUA Digital Attendance System – Data Extraction & Visualization -(Link)

- Developed a concurrent attendance data extraction and analytics platform utilizing multi-threaded web scraping and ETL pipelines to retrieve student attendance records, reducing data retrieval time by ~40%, while providing real-time analytics dashboards, anomaly detection for unusual login activities, and supporting 600+ weekly users with sub-second performance through caching and Incremental Static Regeneration (ISR).
- **Tech Stack:** Python, Flask, BeautifulSoup, ThreadPoolExecutor, Next.js, Google Sheets API, HTML, CSS, JavaScript, ETL Pipeline, Web Scraping, ISR.

Railway Leave Management System -(Link)

- Developed a full-stack Railway Leave Management System to automate employee leave requests, approval workflows, employee management, real-time dashboards, and reporting for 200+ employees across 12 railway stations, integrating email-driven leave processing and live analytics.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, Gmail IMAP, React Query, Tailwind CSS, MongoDB Atlas.

TECHNICAL SKILLS

Languages: Java(OOP, DSA), C, Python(Basic), Kotlin (Basic Android)

Web Development: HTML, CSS, JavaScript, Node.js, Express.js, React.js, MySQL, MongoDB

Technologies : Machine Learning, Artificial intelligence

Tools: Git, GitHub, Docker, VS Code, Cursor, XAMPP

ACHIEVEMENTS

- Winner – AI Anantapur Police Hackathon 2026 for developing a Cyber Fraud Money Trail Intelligence System.
- Achieved **Elite + Top 5%** in NPTEL Natural Language Processing (**IIT Kharagpur**), securing **78%** among 4,939 certified candidates.
