Education

B.Tech Computer Science And Engineering
Jawaharlal Nehru Technological University Anantapur

Aug 2023 – May 2027
CGPA: 8.64/10

Intermediate (MPC)
SR Junior College
Projects

July 2021 – June 2023
Percentage: 98.3

AI Anantapur Police Hackathon – Cyber Fraud Money Trail Intelligence System-([Link](#)) 2026

- Built a **financial fraud detection and money trail analysis platform** using **Node.js, React.js, PostgreSQL, Python, and D3.js**, processing **1,000+ transactions** to detect linked accounts and visualize fraud networks.
- Implemented **graph analytics, risk scoring, freeze recommendation, and recovery tracking** features to identify suspicious transaction patterns, accelerate cyber fraud investigations, and enhance decision-making.

JNTUA Digital Attendance System – Data Extraction & Visualization-([Link](#)) 2025

- Developed a **concurrent web scraping and ETL pipeline** using **Python, Flask, BeautifulSoup, and ThreadPoolExecutor**, reducing attendance data retrieval time by **~40%** while leveraging **Google Sheets** as a cost-effective data storage and visualization solution.
- Built and deployed a **Next.js analytics dashboard** with **Incremental Static Regeneration (ISR)**, supporting **600+ weekly users**, achieving **sub-second load times** through caching, and implementing **rule-based anomaly detection** for unusual login activity.

Railway Leave Management System-([Link](#)) 2025

- Developed a **full-stack Railway Leave Management System** using **React, TypeScript, Node.js, Express, and MongoDB**, automating email-based leave request processing, approval workflows, employee management, real-time dashboards, and reporting for **200+ employees across 12 stations**.
- Implemented **Gmail IMAP integration, cron-based email automation, Server-Sent Events (SSE), role-based leave validation, MongoDB aggregation, and RESTful APIs**, ensuring real-time updates, synchronized leave statistics, and accurate employee and station records while preserving historical data.

Technologies

Programming Languages: Python, Java(OOP, DSA), C, Kotlin (Basic Android)

Web Development: HTML, CSS, JavaScript, Node.js, Express.js, React.js, MySQL, MongoDB

Machine Learning & AI: Supervised Learning, Regression & Classification (Logistic Regression, KNN, SVM, Decision Trees), K-Means, Model Evaluation (Precision, Recall, F1-score), Scikit-learn, Pandas, NumPy

Data & Visualization: D3.js, Graph Analysis

Tools: Git, GitHub, Docker, VS Code, Cursor, XAMPP

Experience

Full Stack Developer Intern| QClairvoyance-([Link](#))

- Developed the **QClairEdu Learning Management System (LMS)** using **React.js, JavaScript, and Python**, implementing interactive learning features such as **flashcards, streak tracking, and educational content management** to enhance student engagement and learning experience.
- Engineered a **Retrieval-Augmented Generation (RAG)** system using **Python and Large Language Models (LLMs)** to deliver **context-aware AI responses** from educational content, while improving content organization and integrating visual learning assets across multiple modules.

Achievement

- **Winner** – AI Anantapur Police Hackathon (2026) for developing a Cyber Fraud Money Trail Intelligence System.
- Solved 500+ problems on LeetCode with consistent 200+ days streak, demonstrating strong problem-solving in DSA
