Summary — I am a Computer Science undergraduate with strong skills in Java, Data Structures & Algorithms, and web development. Experienced in building practical and scalable software solutions through hands-on projects. Passionate about problem-solving, writing clean code, and continuously learning to transform ideas into functional applications.

Skills

Languages: Python, Java(OOPS, DSA), C, kotlin

Frontend: Html, Css, JavaScript

Backend: Php, Node.js, RESTful APIs, JWT Authentication

Database: MongoDB, Mongoose (Schema Design), MySQL

DevOps & Tools: Git, GitHub, Docker, VS Code, Xampp

Education

2023 - 2027 B.Tech in Computer Science & Engineering
JNTU Anantapur College of Engineering (CGPA: 8.64)
Relevant Coursework: Data Structures, Algorithms, OS, DBMS, Networks, OOP

2021 - 2023 Intermediate (Class XII)
SR Junior College, Anantapur (98.3%)

Projects

Virtual Classroom System ([link](#)) Dec 2024 – Apr 2025

- Designed and developed a web-based classroom platform using **HTML, CSS, JavaScript, PHP, and MySQL**
- Built separate login systems and dashboards for students and teachers
- Enabled video and material uploads by teachers, with restricted access for students
- Implemented **email notification system** for sending updates to specific branches and years
- Improved accessibility and learning flexibility through a student-centered interface

Student Grievance Portal([link](#)) Aug 2025-Oct 2025

- Built an online **grievance management system** for students to submit and track complaints easily.
- Integrated **admin panel functionality** for efficient issue tracking and resolution.
- Improved **transparency and communication** between students and institution authorities.

CampusMess([link](#)) Nov 2025 – Dec 2025

- Built **CampusMess**, a web application for hostel students to view the daily mess menu.
- Displayed **real-time daily menus** that automatically update and expire after 24 hours.
- Organized menus by **breakfast, lunch, and dinner** for easy viewing.
- Managed **hostel-wise menus** so students see menus specific to their hostel.
- Allowed users to **add menu items with optional images**.

SmartAlarm – Task-Based Android Alarm App([link](#)) Jan 2026 – Feb 2026

- Created an Android alarm app that **does not stop ringing until the user completes a task** like solving a math problem or typing a sentence.
- Ensured the alarm **works even when the phone is locked or the app is closed**, so it reliably wakes the user.
- Tested the application on a real Android phone and confirmed it works correctly without crashing.

Contributions

JNTUA Student Attendance Checking WebApp([link](#))

Sep 2025 – Oct 2025

- Built a **web app** to calculate attendance and show “Can Skip” / “Need to Attend” classes.
- Developed an **Android app using Kotlin** with the same attendance calculation logic.
- Helped students maintain **75% attendance** with clear and accurate results.

Crop Disease Identifier([link](#))

Dec 2025 – Jan 2026

- Contributed to an open-source **plant disease classification** project.
- Added a **camera capture feature** for direct image input.
- Implemented **disease-wise precaution guidelines** for users.

Smart Cultivation System — Departmental Science & Technology (DST) Project([link](#))

Jan 2026– Feb 2026

- Integrated a **Crop Disease Identifier module** into the system.
- Designed and developed the **complete user interface**.
- Worked as part of a **departmental Science & Technology project**.

Experience

Open Source Contributor — Joomla CMS([link](#))

- Fixed a performance issue causing duplicate database queries in the Popular Tags module (*PR #46827, Issue #46816*)
- Cleaned up the build system by removing Symfony test folders from release packages (*PR #46765, Issue #46764*).
- Resolved PHP warnings when opening the Page Break modal in Joomla 6 (*PR #46908, Issue #46901 – under review*).

Open Source Contributor — FOSSASIA (Eventyay)([link](#))

- Fixed broken schedule editor UI by correcting a template ID–CSS selector mismatch and removing deprecated styling code (*PR #2192, Issue #2189 — merged*).
- Implemented conditional visibility of CFP profile links so speaker options appear only when users have submissions and CFP is public (*PR #2382 — under review*).
